

## ***Creating and Addressing Your Opposition (20 min)***

**Step One—10 Minutes:** Have your peers, from peer review, do the following: think about why your opinion would be wrong. **What would a reasonable and sane person say to your thesis?**

**Step Two—10 Minutes:** Take a look at the following templates, and respond, using the templates, to your peer's opposing views:

a. Although I grant that \_\_\_\_\_, I still maintain that \_\_\_\_\_.

b. Proponents of \_\_\_\_\_ are right to argue that, but they exaggerate when they claim that \_\_\_\_\_.

c. While it is true that \_\_\_\_\_, it does not follow that \_\_\_\_\_.

d. On one hand I agree with \_\_\_\_\_ that \_\_\_\_\_, but I still insist that \_\_\_\_\_.

e. Yet is it always true that \_\_\_\_\_? Could it not be true that \_\_\_\_\_.

f. \_\_\_\_\_ may have a point about \_\_\_\_\_, but \_\_\_\_\_ shows that \_\_\_\_\_.
