Making the Prompt or Question for Today’s Debate

In groups of three come up with some question, related to schooling, that we could debate, using Friere, Kozol, Quart, and Cushman. A question that was under debate before was, “Should K-12 schools be revamped to make the students more a part of the academic aspect of schooling?” See if you can improve upon this.

After you are done, put up your group’s best question on the chalkboard. As a class, we will choose the best debate prompt or question.
