Clear Channel Question

Look at the text below, and answer this question: what might be the results of a company, like Clear Channel, owning so much if they are as apolitical, stylistically uncaring, and uninvolved in communities as is pointed out below:

All the Clear Channel talent buyers, “on-air personalities,” news directors, and executives I spoke with shared a basic disregard for both the content of the product and its quality. The market would take care of those. Clear Channel’s functionaries seemed to view the company as some marvelous but unfathomable machine with whose upkeep they had been charged. They knew only that it accomplished a miraculous task—satisfying the musical tastes of most of the people—and did not care to trouble themselves with how.
