Writing from Research Work

Step One
Find, using one of the databases, a source to use on your topic, or **refind** a piece that you are already writing with.

Step Two
After you are done, write down, as a quote **or** as a paraphrase, a fact from the piece. Next, using the information at http://www.utoronto.ca/writing/reporting.html, make sure that you introduce the quote as it would appear.

Step Three: Finally, using one of the following sources, create an **in-text** citation, footnote, or endnote for your quote.

- a. Purdue OWL information on APA: http://owl.english.purdue.edu/owl/resource/560/03/
- b. Purdue OWL on MLA: http://owl.english.purdue.edu/owl/resource/557/03/
- d. *Science Magazine*: http://www.sciencemag.org/about/authors/prep/res/refs.dtl
- e. CSE: http://ia.juniata.edu/citation/cse/cse00.htm
- f. Noodletools: http://www.noodletools.com
- g. Endnote: https://www.myendnoteweb.com/EndNoteWeb/2.1/release/EndNoteWeb.html

Be ready to talk about issues of quotation and paraphrasing after we are done.
